Wireless Healthcare Systems

Compact. Durable. Efficient.

Our Solutions

NURSE CALL SYSTEM (NCS)

Patients can send 1 click alerts from beds or washrooms to Nurses, Doctors or Caregivers during Emergencies.

Press Call Button during Emergency from bed or washroom

Alert pops up on Display, Monitor & patient's Door indicator

TOKEN DISPLAY SYSTEM (TDS)

Used primarily for queue management, these wireless systems make managing patients and appointments easy.

Dial token no on keypad or 'next' token on buttons

Instantly the Token no. displays on screen
