

SPEED RADAR GUN SR 10 P

Introduction:

For traffic speed supervision and control, by technologies of SCM, Microwave and Programming and filtering, with advantages of multi function, and easy to carry and Operate.

Features:

- Both Moving and Stationary Version,
- Far distance effect, High accuracy,
- Mini-printer built inside, convenient to output the record,
- Autocratic sell test,
- Pre-enacted speed restriction,
- Over speed alarm,
- Lock and recall,
- Automatic calendar and clock,
- Compact Size, Light weight, Few Key
- Optional Special Tripod

Technical Data:

Transmitting frequency: 35 GHz

Target speed measuring: STA mode 20 – 180km/h; MOV mode 20 – 220km/h

MOV Max effective distance: STA mode >600m

(To middle or small vehicle) : MOV mode (parallel) >200m; MOV mode (opposite) >300m

Speed measuring tolerance: STA mode <1km/h; MOV mode <2km/h

Power supply: 11V – 16V

Operation environment temp: -20°C – 50°C

Size: 240mm long, 70mm wide; Weight 1.3Kg
