

Vacuum Cleaners

The IPC line of wet and dry vacuum cleaners is designed to offer maximum performance in a wide range of applications (from commercial to industrial) and the most demanding users.

The high quality construction guarantees great reliability and durability, thanks to the use of high quality materials such as steel tank and plastic heads and trolleys which resist damage in case of impact or particularly heavy use.

The machines, designed to offer high performance, great productivity, durability, user comfort and easy maintenance, are equipped as standard with Sanifilter which prevents the proliferation of bacteria, fungi and micro-parasites in the tank.
