

DOOR FRAME METAL DETECTOR

Features:

- Stable performance, 8 Zones.
- Sound and Light alarm.
- System Sensitivity: 0-100

Characteristics & Functions:

- There are 8 pinpoint zones of the door frame.
- Based on Auto-set microcontroller.
- Operational frequency can be adjusted manually and automatically.
- Sensitivity of each zone from 0 to 200.
- Alarm and pass/reverse counter facility available.
- Detects all types of Metals.
- Security level up to 100 levels.
- Self-calibration starts once powered ON.
- Frequency level up to 50 levels.
- Detection Technology – Even detection technology.
- Waterproof mica pasted on panel & provided ABS plastic boot top bottom (IP 65 Protected).
- Various detection occasions can set sensitivity as per location.
- Harmless to the human body (Heart Pacemaker, Pregnant Women, Magnetic Floppy, Recording Tape etc.
- Working standby: 16 high brightness LED indicator ON.
- Detection speed: More than 60 people pass & detect in 1 Minute.

Technical Parameter

- NABL Tested (Government Approved Lab)
- Dimensions: approx 2240mm (h) x 840mm (w) X 650mm (d) $\pm 5\%$.
- Net wt.: Around 67 kgs.
- Power: 230V, 50/60Hz.
- Humidity: 95% Non-condensing.
- Workplace Environment: - 20°C to 55°C.
