

Safety Cone – Nilkamal 750mm

Safety Cone – Nilkamal

Height – 750 Mm

Weight – 3.5 to 4 Kg Approx

Hexagonal Heavy Duty Inbuilt Base

Warranty:- Not Applicable

Traffic cones are typically used outdoors during road work or other situations requiring traffic redirection or advance warning of hazards or dangers, or the prevention of traffic. Traffic cones are also used to mark where children are playing or to block off an area. For night time use or low-light situations traffic cones are usually fitted with a retroreflective sleeve to increase visibility. On occasion, traffic cones may also be fitted with flashing lights for the same reason.
